

INTERVIEW WITH FABULOUS INC.'S HENRIETA "YOU CAN BE STYLISH, SOPHISTICATED AND FABULOUS!"

Q: What are the services you offer?

A: Fabulous Inc. offers wardrobe consultation, personal style consultation, fashion advice, personal shopping for wardrobe, special occasions, gifts, trips and more. It's one - on - one very personal service. I cater to everyone and am plan on expanding my services in the near future.

Q: When you work with a client as a wardrobe consultant what is the process to help them look their best?

A: First, there are client's needs and lifestyle, personal style and preferences. Then their body type and complexion. It all has to be taken in consideration. After that I would like to take a look at the client's wardrobe and discuss the pieces. We consolidate pieces that do not work or that the client did not wear for a long time and then we decide what we can add to a wardrobe or what needs to be replaced.

Q: Are there certain things we should have in our closet that are good basic pieces?

A: Of course there are the perfect black pants, a pencil skirt, blouse, cashmere sweater and great jacket. Let's not forget LBD. I would add more great fitted pants and another skirt and some fun top.

Q: What about accessories?

A: Accessories are essential. You cannot go wrong with a fabulous piece of jewelry, interesting scarf and great belt and do not forget the purse! You can update your look with an accessory piece very fast and for a good price. You should wear one fabulous piece every day.

Q; Does someone have to spend a lot of money to improve their style?

A: No and sometimes it costs more when you buy something that is not for you and you don't wear it. If you are not sure what works for you ask for help , it might save you a lot of money on those costly mistakes in your closet.

Q: How often should we update our clothes and accessories?

A: It depends, but you can always add some nice updated reasonable pieces every season and work it out with what you already have.

Q: What are the advantages of using a wardrobe consultant?

A: As I mentioned before, it can save you money , it will be faster and less time consuming when you use professional eye and you might freshen up your look the way you never thought of. You might also learn a lot.

Q: What made you decide to get into fashion consulting?

A: Since my childhood I was into clothes and have been designing custom made clothing since I was 10 years old. I came to the US in 2000 from Slovakia and since 2001 I've worked in the fashion business, selling, buying, styling. I managed a boutique downtown and then became a personal shopper at Lord & Taylor. I constantly study fashion and keep myself updated every day.
